EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jay M. Cantor on May 31, 2005.

The application has been amended as follows:

Claim 15 (currently amended) The receiver according to claim 14, wherein said controller is operative to set the LNA to low gain mode and said mixer to low gain mode to achieve maximum linearity and maximum 3rd order intercept point.

EXAMINER'S STATEMENTS OF REASONS FOR ALLOWANCE

2. Claims 9, 14, and 15 are allowable over prior art because related references do not disclose setting the LNA and mixer to different gain modes using a controller, including a detector which comprises of a limiter, discriminator, and data slicer. Claims 16, 17, and 19-22 are allowable over prior art because prior art references do not disclose setting the LNA and mixer to different gain modes to improve linearity while reducing sensitivity and a controller which switches to a state having a lower sensitivity in response to a low correlation; a controller which switches the receiver back to a previous state if the error rate obtained in a new state is

worse than the error rate in a previous state; and a controller which sets the receiver to a low gain state in response to a high RSSI reading and a high error rate.
